

SCHOOL READING PROGRAM

Worldreader is creating a future where everyone can be a reader. Using low-cost technology (such as e-readers and mobile phones), a personalized digital library, and a worldwide network of corporate and nonprofit partners, we help millions of people reach their potential.

Worldreader's work is organized around four major program areas that span the lifecycle of a reader: pre-reading, school reading, library reading and life long reading.

WORLDREADER SCHOOL READING PROGRAM

Worldreader's school reading program aims to improve literacy, drive learning, and promote a love of reading among students.

Today, millions of school-aged children around the world do not have access to textbooks.

The program brings relevant and informative digital books to students in a fast and scalable way, delivered on e-readers. As part of the program we provide teacher support and community engagement activities to ensure the effective and widespread adoption of the program, ultimately improving the students' educational outcomes.

PROGRESS

Since 2010, we have reached

118,935
 readers

in

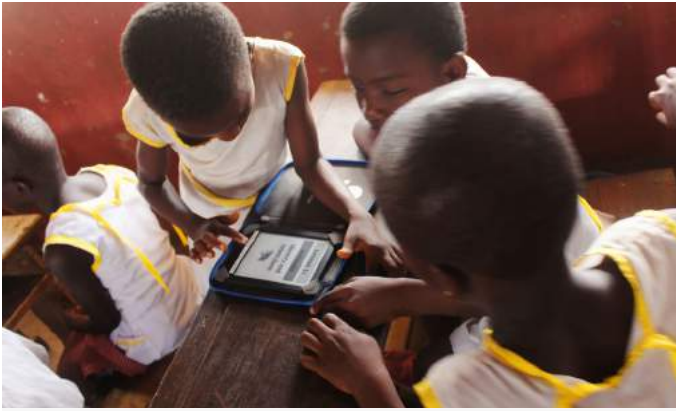

398
 schools

who read

4,452,699
 books

PROJECTS

Ghana District Scale

Ghana District Scale is Worldreader's first-ever district-run digital reading program for schools. This project will facilitate the scaling of digital reading to all 90 public primary schools within the district of Kwabebirem in Ghana.

GEC-T

We've partnered with Camfed to give female students access to digital learning resources and support so they can develop the English literacy and language skills that will improve their life chances.
